

THE SCIENCE OF

RESULTS YOU CAN TRUST

PaGE will provide both pre-test education and post-test counseling to patients for the HerediT[®] CF, HerediT[®] UNIVERSAL, VisibiliT[™], MaterniT21[®] PLUS, and MaterniT[™] GENOME laboratory-developed tests.

SEQUENOM LABORATORIES PATIENT GENETIC EDUCATION (PAGE) PROGRAM

Sequenom Laboratories is pleased to announce PaGE, our new Patient Genetic Education program. Our goal is to eliminate barriers and provide additional genetic counseling support and services to your patients when needed.

PRE-TEST EDUCATION

Pre-test education includes a 15-minute telephone session with one of our board-certified genetic counselors. The session will include a pre-test discussion of the benefits, risks and limitations of the Sequenom Laboratories test that you've discussed with your patient. We will provide a documented clinical note for your practice to keep on file after the session is complete.

POST-TEST COUNSELING

Post-test counseling will include a 30-minute telephone session with one of our board-certified genetic counselors for any abnormal screening result from our portfolio of testing options. The documented clinical report will be provided to both the ordering clinician and the patient.

HOW CAN MY PATIENTS BECOME ELIGIBLE FOR COUNSELING?

For **pre-test counseling**, please complete the Pre-Test Authorization Form and fax to 858.202.9108.

For **post-test counseling**, please complete the Post-Test Authorization Form and fax to 858.202.9108. You may also order the service individually for a patient via the Test Requisition Form.

For assistance or questions on enrolling your patient or institution in the PaGE program, please call customer service at 877.821.7266. Once you have successfully enrolled your patient or institution, please provide her with the PaGE patient pamphlet, which details the simple process.
